

VERSION WITH MARKINGS TO SHOW CHANGES MADE

1. (Once Amended) A laptop computer stand, comprising:
 - a member having a first portion and a second portion, said first portion having a first height, said second portion having a second height which is substantially higher than said first height;
 - wherein said member is adapted to receive a laptop computer so as to both angle and space said laptop above a surface [and cantilevers the laptop computer over said member] to facilitate the cooling thereof, wherein said member is concave and opening upward to create space below the supported laptop computer.
8. (Once Amended) The apparatus of Claim 1 [7] wherein said angle is a five degree angle.
12. (Once amended) In combination:
 - a notebook computer; and
 - a stand having a member having a first and second portion supporting the notebook computer at an angle, [wherein the computer is cantilevered over the stand to facilitate cooling thereof] wherein said member is concave and opens upward to create space below the supported laptop computer.
